

HW 2 Portfolio Website Design Document

Name: Andrea Favian Cruz

Purpose of the Website

The purpose of this website is to showcase my projects and technical skills. This website is intended to help recruiters and employers learn more about me and my work.

Audience Considerations

Name: Marcus Henderson

Age: 39

Occupation: Software Engineering Recruiter

Background: Marcus recruits new graduates for software engineering internships and entry-level positions. He reviews many portfolio websites every day and wants to quickly understand a candidate's experience.

Goals:

- Learn about the student quickly
- View technical projects
- Download a resume
- Find GitHub and LinkedIn

Needs:

- Easy navigation
- Professional layout
- Clear project descriptions
- Contact information

Frustrations:

- Missing project details
- Broken links
- Confusing navigation
- Slow websites

Technical Requirements

Some technical requirements may include HTML, CSS, minimal JS, GitHub and Netlify.

Content Requirements

Some content that I would need would be information about myself, almost like a biography. I would need to include my resume, skills, and my contact information. I would also like to include a professional headshot and screenshots of projects. I need to include links to my LinkedIn and Github accounts too.
